Adding some photos from Wednesday to this news story to help create the visual.

1. Bulletin board example of public notice both on turbidity violation and boil water notice (you'll need to zoom in)
- 2-5. Water main break repair showing dilapidated old pipe pulled out, new pipe install with taper to 6 inch pipe going under Shitike creek
- 6-8. Alt water distribution frontage and water storage

Also, you may have notice the line in article about chlorinated water showing up in the creek. I can't confirm what happened previously, but I can confirm they were trying their best to keep it from happening now. The reason they went with the 6 inch pipe taper was so they wouldn't have to disturb the creek. They had tanker trucks and pumps dewatering the DW pipes after the chlorine treatment – they told me that water was trucked off for land application away from surface water.

Bill: FYI.

For EPA's involvement, Adam and Ricardi were on site this week on Wednesday meeting with the tribe and reviewing repairs, emergency planning, and requirements under the orders.

Adam has weekly meetings with Travis Wells, Utilities General Manager, and monthly meetings are being planned with Alyssa Macy to update Tribal Council for July and August.
